## Lesson focus

Genetic counseling memo

## Key words and questions

## Prepared details and student notes

**Essential question**  
**What is today's target?**

Write a counseling memo that interprets a carrier result for a family without overstating risk.  
Big idea: How do you communicate genomic risk honestly without causing unnecessary fear or false certainty?

**My notes, examples, and questions**

**Key words**  
**What vocabulary unlocks the lesson?**

- allele
- genotype
- phenotype
- pedigree
- SNP
- carrier
- genetic counseling

**My notes, examples, and questions**

### Key words and questions

### Prepared details and student notes

**Must-know ideas**  
**What should I understand by the end?**

- A carrier of a recessive condition typically shows no symptoms but has a 50% chance of passing the allele to each child.
- A positive carrier result does not mean the person will develop the disease; it affects reproductive risk calculation.
- Genetic counselors use training in psychology and genomics to prevent both misinterpretation and emotional harm.

**My notes, examples, and questions**

**Process notes**  
**What happens during class?**

- 0-8: Hook: bad search-engine result; discuss what is wrong with it
- 8-20: Review Wednesday carrier result; list what it does and does not mean
- 20-50: Draft counseling memo: finding in plain language, one next step, no overstating
- 50-65: Add sentence on why a counselor, not a search engine, is needed
- 65-75: Peer review: check for overstated claims or missing next step
- 75-80: Submit memo draft to course shell

**My notes, examples, and questions**

### Key words and questions

### Prepared details and student notes

#### Steps and evidence What do I do and turn in?

- Review the carrier result for the case family from your Wednesday table.
- List what the result does and does not tell the family about disease.
- Draft a memo that explains the carrier finding in plain language and names one next step.
- Add one sentence on why a genetic counselor, not a search engine, should guide the decision.
- Submit your counseling memo draft as your daily evidence.

Evidence: CER - Counseling memo: carrier finding in plain language, list of what the result does and does not mean, one next step, and a sentence on the role of genetic counseling.

#### My notes, examples, and questions

#### Checks for understanding How do I know I got it?

- You'll be able to interpret a carrier result accurately for a family.
- You'll be able to explain the role of genetic counseling.

#### My notes, examples, and questions

#### Lab or safety notes What must I handle carefully?

No special lab safety notes today. Follow normal classroom and digital-work expectations.

#### My notes, examples, and questions

### Summary

Today's lesson focused on Genetic counseling memo. The main target was: Write a counseling memo that interprets a carrier result for a family without overstating risk. The evidence of learning is CER: Counseling memo: carrier finding in plain language, list of what the result does and does not mean, one next step, and a sentence on the role of genetic counseling.. In my own words, the most important idea from today is:

**My summary**

**My final question or connection**
