Lesson focus

Submit rehab evidence

Key words and questions

Prepared details and student notes

Essential question
What is today's target?

Submit the rehabilitation evidence set and update your tracker. Big idea: A complete rehabilitation evidence packet shows the full clinical reasoning cycle: reading the patient, designing a plan, revising based on feedback, and defending with evidence.

My notes, examples, and questions

Key words
What vocabulary unlocks the lesson?

- rehabilitation
- empathy
- assistive device
- care plan
- patient portal
- wellness

My notes, examples, and questions

Must-know ideas

What should I understand by the end?

- Evidence packet for this unit requires: empathy notes, initial plan card, revised plan card, and the CER. All four must be dated.
- Reflection on designing care for a real person should address how reading the patient record changed or confirmed your initial instincts about what the patient needed.
- Patient-centered care vocabulary (informed consent, functional goals, progress metrics) is tested in the medical-terminology emphasis of the WebXam.

My notes, examples, and questions

Process notes

What happens during class?

- 0-8: Intro: rubric review and four-artifact checklist
- 8-30: Gather and date-check all four artifacts
- 30-50: Rubric self-check; verify revisions are documented
- 50-65: Update weekly tracker
- 65-75: Write two-sentence reflection: designing care for a real person
- 75-80: Submit packet

My notes, examples, and questions

Key words and questions

Prepared details and student notes

Steps and evidence What do I do and turn in?

- Gather your empathy notes, rehab plan, and revision CER.
- Check each against the evidence rubric for completeness.
- Update the weekly tracker with completed tasks.
- Write a two-sentence reflection on designing care for a real person.
- Submit the rehab evidence packet for the weekly summative.

Evidence: Tracker entry - Complete rehab evidence packet: empathy notes, original plan card, revised plan card, CER, and two-sentence reflection.

My notes, examples, and questions

Checks for understanding How do I know I got it?

- You can assemble a complete rehab evidence packet.
- You can reflect on patient-centered design.

My notes, examples, and questions

Lab or safety notes What must I handle carefully?

No special lab safety notes today. Follow normal classroom and digital-work expectations.

My notes, examples, and questions

Summary

Today's lesson focused on Submit rehab evidence. The main target was: Submit the rehabilitation evidence set and update your tracker. The evidence of learning is Tracker entry: Complete rehab evidence packet: empathy notes, original plan card, revised plan card, CER, and two-sentence reflection.. In my own words, the most important idea from today is:
